EXP NO : 10

10. Create a visual representation in Figma showcasing the differences between various multiple access techniques.

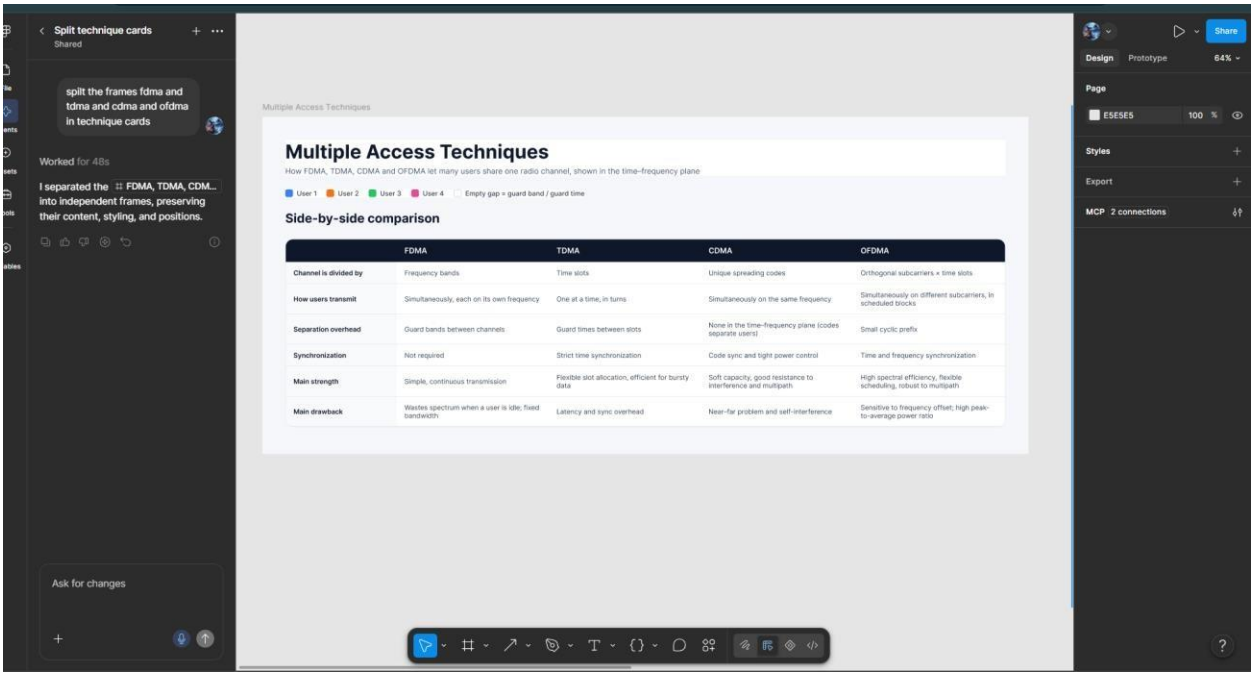

Aim: -

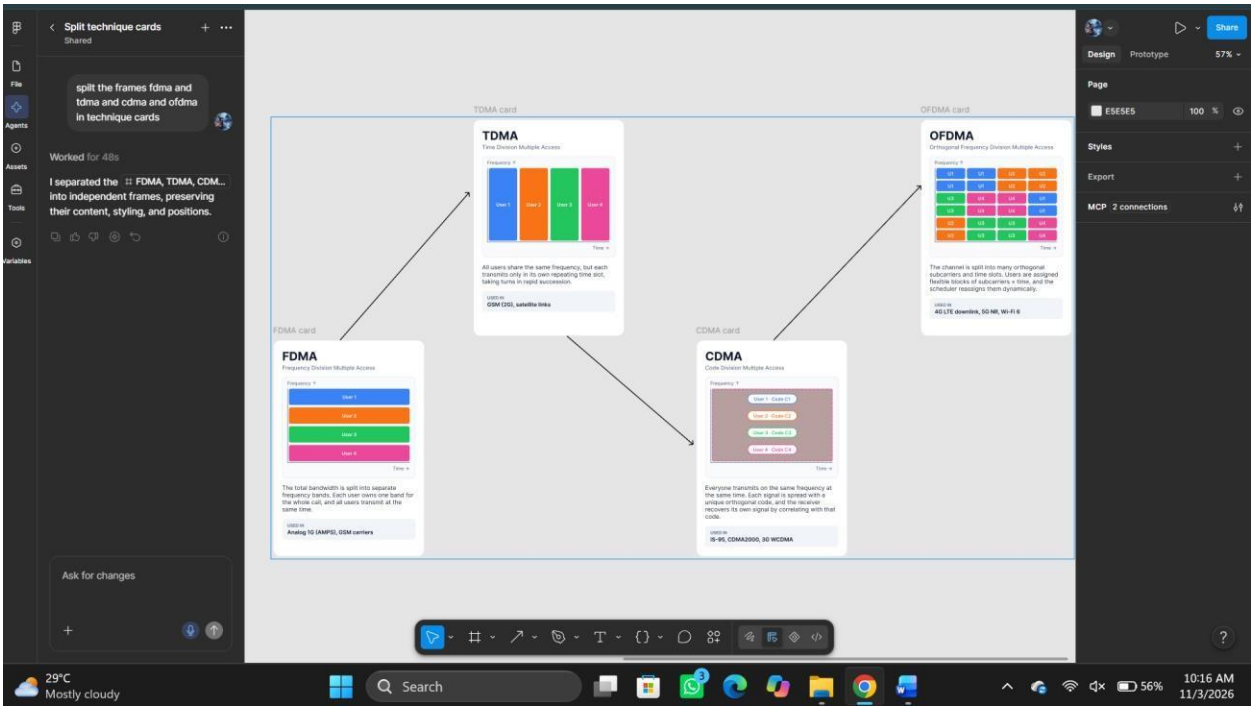

To create a visual representation in Figma showcasing the differences between various multiple access techniques.

Procedure: -

1. Open Figma
2. Create a new file
3. Select the Frames
4. Fill in the content that is required for presentation
5. Design Visual Elements
6. Make it Interactive
7. Add Annotations and Explanations
8. Incorporate Multimedia
9. Storyboard Animation
10. Review and edit the Prototype
11. Save and Share

Design :-

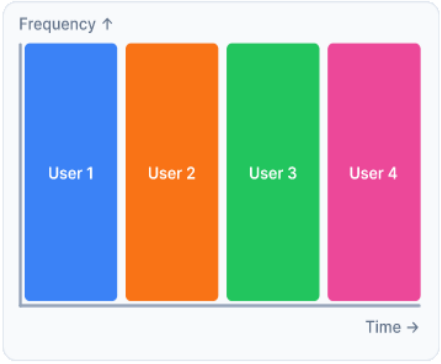

Prototype:-

TDMA

Time Division Multiple Access

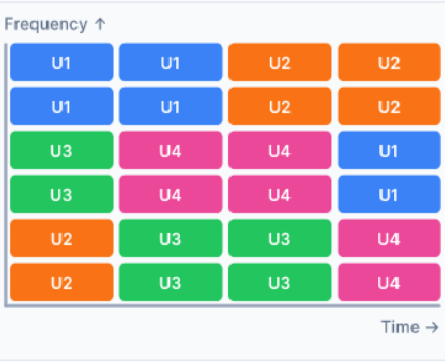

All users share the same frequency, but each transmits only in its own repeating time slot, taking turns in rapid succession.

USED IN
GSM (2G), satellite links

Multiple Access Techniques – FDMA, TDMA, CDMA, OFDMA

OFDMA

Orthogonal Frequency Division Multiple Access

The channel is split into many orthogonal subcarriers and time slots. Users are assigned flexible blocks of subcarriers × time, and the scheduler reassigns them dynamically.

USED IN
4G LTE downlink, 5G NR, Wi-Fi 6

Result: -

Hence created a visual representation in Figma showcasing the differences between various multiple access techniques.
